

TECHNICAL EXHIBIT 10

ESTIMATED CLASSIFIED AND SENSITIVE WORK BY JOBS

Sensitive Jobs include exams with restricted distribution, procurement sensitive data, personnel records, and legal documents on pending cases. It should be noted that customers determine the level of sensitivity for the work that is produced for them.

In addition, SYSOUT jobs contain multiple batched files within each data transmission, but are counted as a single job. For example, if 100,000 digital records are sent to DAPS in one data file, they are only counted and billed as a single job.
